Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 December 2003.

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/371,354, filed on 20 February 2003.

Specification

2. The disclosure is objected to because of the following informalities: On page 1, before the first line, the complete continuing data should be included.

Appropriate correction is required.

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: PROCESS OF MAKING
POLYESTER YARN.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1732

5. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Nishikawa et al (U.S. Patent 5,066,439 A).

Nishikawa et al (see the entire document, in particular, col. 1, lines 5-9; col. 2, line 30 to col. 5, line 11; Examples; Table 1) teaches a process of making a polyester yarn as claimed.

6. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Neal (U.S. Patent 5,277,858 A).

Neal (see the entire document, in particular, col. 1, lines 9-15; col. 2, line 32 to col. 4, line 37; Examples) teaches a process of making a polyester yarn as claimed.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered

Art Unit: 1732

therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Nishikawa et al (U.S. Patent 5,066,439 A) or Neal (U.S. Patent 5,277,858 A) as applied to claim 4 above, and further in view of Ruitenbergh et al (U.S. Patent Application Publication 2004/0032049 A1).

Ruitenbergh et al (see the entire document, in particular, paragraph [0028]) teaches a process of making a polyester yarn including two relaxation steps, and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of either Nishikawa et al or Neal in view of Ruitenbergh et al principally in order to manufacture a yarn having low shrinkage properties.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B. Tentoni whose telephone number is (571) 272-1209. The examiner
